

ALLEN SPINAL CORD ATLAS THIRD-PARTY SOURCES

- **Jane Roskams, Ph.D., Associate Professor, Department of Zoology Brain Research Centre and iCORD at the University of British Columbia**
The Roskams Lab is in the Department of Zoology at the University of British Columbia, Vancouver. The lab is a core lab of Cell and Developmental Biology at UBC, and the Canada-wide Stem Cell Network Centre of Excellence. The lab is also a member lab of the Brain Research Centre and the international Collaboration on Repair Discoveries (iCORD).
- **Lucie Bruijn, Ph.D., Director and Vice President at the ALS Association**
The ALS Association's mission is to lead the fight to cure and treat ALS through global, cutting edge research, and to empower people with Lou Gehrig's disease and their families to live fuller lives by providing them with compassionate care and support.
- **Jeffrey D. Rothstein, MD, Ph.D., Professor of Neurology and Neuroscience at Johns Hopkins University**
Researchers at Johns Hopkins' Neuroscience department are searching for answers to the most difficult questions about the human mind—how do we perceive, understand, react and remember. They are also striving to understand the causes of neurological disease. How can the devastating consequences of stroke be ameliorated? How can neurons be replaced and stimulated to regrow their connections following neuronal degeneration or injury? How do environmental factors cause neurons to die?
- **Bruce Trapp, Ph.D., Chairman Neurosciences at the Cleveland Clinic**
The Cleveland Clinic is a not-for-profit, multi-specialty academic medical center that integrates clinical and hospital care with research and education. Dr. Trapp will be using the Spinal Cord Atlas in his research surrounding multiple sclerosis.
- **Thomas Stripling, Director of Research and Education at Paralyzed Veterans of America and/or Maurice L. Jordan, Deputy Executive Director at Paralyzed Veterans of America**
Founded in 1946, Paralyzed Veterans of America (PVA) is the only congressionally chartered veterans service organization dedicated solely to serving the needs of veterans with spinal cord injury or disease.
- **Gregory A. Cox, Ph.D., Associate Professor, The Jackson Laboratory**
The Jackson Laboratory is an independent, non-profit organization focusing on mammalian genetics research to advance human health. The organization is dedicated to conducting genetic research, providing scientific services and genetic resources to laboratories around the world and educating students of all ages through courses, internships and other programs.
- **Jack Faris, President of the Washington Biotechnology and Biomedical Association (WBBA)**
The WBBA is a not-for-profit association of Washington state biotechnology and biomedical companies, research firms and related organizations.
- **Patricia A. O'Looney, Ph.D., Vice President of Biomedical Research at the National Multiple Sclerosis Society (NMSS) or John Richert, Ph.D., Executive Vice President of Research and Clinical Programs at NMSS**
The National MS Society is a collective of passionate individuals who want to do something about MS now—to move together toward a world free of multiple sclerosis. MS stops people from moving. The organization exists to make sure it doesn't.
